**LIRA**  
Daniel Rybakken, 2024

LIRA is the first seating collection designed by Scandinavian designer Daniel Rybakken for Alias. It is the result of a meticulous design process in which a strong, minimalist character is combined with unexpected comfort, guaranteed by the deep curvature of the seat. The geometric silhouette that characterises the whole collection is counterbalanced by the natural materials used; LIRA is made of solid ash wood with elements in curved ash wood, available in a natural finish or in coloured stains. The chair and the stools are supported by steel feet lacquered in different colours, in textured or gloss finishes. With LIRA Daniel Rybakken aims to create an essential collection with an iconic silhouette.
