Bone Table

In 2002, Danish designer Kasper Salto introduced the eye-catching Bone Table, named after its sculptural, cross-positioned legs, which seem to support the glass top almost invisibly. The Bone Table is crafted at OneCollection's own workshop in Ringkøbing, Denmark, and is available in solid FSC-certified oak, ash, and walnut.

The Bone Table is being relaunched as both a dining- and conference table with a diameter of 160 cm, as well as a coffee table with a diameter of 100 cm. It is available through all OneCollection and House of Finn Juhl retailers.

Technical information

General Info

Design by: Kasper Salto

Year: Launched in 2002, relaunched in 2025

Dimensions:

Ø: 160 cm

H: 71 cm

Glass thickness: 12 mm

Specifications

Model and materials
