

Luzy
INGO MAURER 2018

A blue glove with one frosted bulb at the tip of the pointing finger. Surprising and unconventional. Controversial, free of restrained thinking and the boredom of the ubiquitous repetitive designs. Material: Plastic, metal, low-voltage lamps.

Light source

LED 12V 1,5 W, 130 lm, 2700 K, 20000 h, CRI >90, EEC G (A-G), E27. It can be exchanged by the user.

Technical data

For 230 volt or 125 volt mains voltage, dimmable (dimmer not included)

Colours

Each blue glove is hand-painted with a special colour. This is hygrostatic and therefore not suitable for rooms with high humidity. Luzy is made with left and right gloves.
