The utmost expression of technology applied to design, LALEGGERA is a collection of chairs that conceal the meeting between a traditional material, solid wood, and the most modern, lightest expanded polyurethane that fills the structure. The covering in different glued wood veneers or strips of multilaminate veneer is available with a transparent varnish finish or lacquer in various colours. In 1998 Laleggera chair was awarded the Compasso d'Oro ADI prize and in 2009 it became part of the permanent collection of the MoMA in New York.
